4

**BMTC NammaPass**

Application Name	: BMTC NammaPass ( <a href="https://nammapass.series-5.com/#/dashboard">https://nammapass.series-5.com/#/dashboard</a> )
Role	: UX Designing, UI Development
Tools Used	: Adobe Photoshop, Adobe Illustrator, Adobe XD
Languages	: HTML5, CSS3, JavaScript
Frameworks Used	: JQuery, Bootstrap, Ionic.
Team Strength	: 1

**Description :**

BMTC NammaPass is mobile view based webApp. Passengers travelling in BMTC's Vajra AC buses can get digital bus passes through this webApp. Passengers don't have to download any mobile app to use the facility, instead they can visit webpage [www.nammapass.series-5.com](http://www.nammapass.series-5.com), enter personal details, upload a selfie and pay for the daily pass through PhonePe wallet. Selfie is mandatory to avoid the same pass being used by multiple passengers.

On boarding, the passenger has to show the digital pass ticket on his/her mobile phone to the conductor. The conductor will then provide his/her ID number to the passenger. Once it is validated, an SMS will be sent to the conductor's mobile and BMTC server. Then the conductor will enter the Namma Pass number on the electronic ticketing machine.

**Some of the Features of the Application :**

- Hashless Vajra's bus ticket booking.
- View / Show the ticket. and validity count down for ticket.
- Payment gateway for digital payments.

**Responsibilities :**

Logo Designing for NammaPass in English and Kannada Languages  
 Making the website in only mobile view.  
 used Ionic framework for Hybrid mobile App.  
 Dashboard UX design and Poster designings.

5

**Yellow Pages of Kazakhstan**

Project Name	: Yellow Pages of Kazakhstan ( <a href="http://ypk.kz/">http://ypk.kz/</a> )
Role	: UX Designing, UI Development
Tools Used	: Adobe Photoshop, Adobe Illustrator, Adobe XD
Languages	: HTML5, CSS3, JavaScript
Frameworks Used	: JQuery, Bootstrap.
Team Strength	: 2

**Description :**

The Yellow Pages of Kazakhstan allow users to search for companies and ads located in Kazakhstan. You can search for a company and ads in different categories and subcategories. When you download the application takes much less time, and also consumes an impressively smaller amount of space in your device. As a result, you get more from it, because they instantly offer search results within a few seconds.

**Some of the Features of the Application :**

- Search result based on city and company / Category name
- Filter the result using the selected category and subcategory
- The company and classified parts can be viewed on the detailed page.

**Responsibilities :**

For Mobile App UX templates designing and Development.  
 Converting XD and PSD files to HTML5.  
 Making the website in Responsive view.
